

## Implementation System Engineer

### About us:

Revionics is a leader in the emerging technology of Retail Lifecycle Price Management.

Our solution covers:

- Everyday Price Planning & Optimization
- Promotion Price Planning & Optimization
- Markdown Price Planning & Optimization
- Integrated Demand Forecasting

Revionics provides sophisticated software that analyzes consumer trends in addition to other variables such as cost, competition, and price strategy, to help determine the best price for each item sold in retail stores. Our technology is delivered in a Software-as-a-Service (SaaS) fashion as a subscription via the Internet. This approach allows retailers of all sizes access to technology and pricing expertise that they may not be able to otherwise afford.

### Role and Responsibilities:

The position is suited for a highly motivated, highly technical individual with the ability to professionally interface with customers. The individual will have hands on ETL or Informatica development experience with a proven record of building and coding the framework necessary for data integration and process workflow. The individual will also have a proven ability to work within a team in a demanding environment and must demonstrate leadership skills working with multiple people, projects and cutting edge technology, while maintaining a high level of execution.

### Duties:

- Master Informatica Power Center
- Work with customers remotely and on site to assist them with data integration activities.
- Respond to customer change requests, support calls and production issues
- Coordinate with and manage data Integration services business partners
- Ensure the timely and accurate customer data collection process from multiple disparate sources into a single manageable customer database environment based on Microsoft SQL Server.
- Engage in data collection, cleansing and mapping.
- Review incoming files and provide feedback on the level of data quality and completeness based on Revionics data specification standards.
- Configure customer database in preparation for weekly price optimization analysis.
- Document customer system data flows and data integration requirements specifications
- Configure database settings and develop data integration mappings and workflows.
- Design, develop and maintain Data Integration processes
- Collaborate with Product Development and Customer Service teams.
- Provide regular reports on data collection activities and progress

### Skills:

- Preferred candidates will have understanding of data formats and prevalent commercial databases.
- Candidates will also have strong T-SQL skills (Queries, Triggers, Stored Procedures, etc).
- Candidates will understand common Internet-based file transfer techniques.
- Candidates will also have proven computer skills with common Microsoft tools such as Windows, Office, Visio, Project, and SQL Server.
- Ideal candidates will be knowledgeable with retail item catalogs and related master files.

- Must have superb Customer communications skills, written, oral and face-to-face
- Ability to turn business issues into technical solutions
- Ability to develop collaborative relationships both internal and external
- Ability to navigate and manage technical issues internally and externally
- Demonstrates passion and enthusiasm
- Extreme attention to minute detail
- Superb organization and time management skills
- Highly logical and technical person
- Well-developed team leadership skills
- A team player that can add value technically and personally

**Preferred Experience:**

- Minimum of 2 years of experience in data management and synchronization.
- 5 years of experience with ETL
- 2 years programming experience or equivalent education is required.
- Retail technologies experience a major plus!
- 1 years proven Power Center, Data Transformation Development and/or Informatica Administration experience

**Knowledge Of:**

- T-SQL (Bulk Copy Program – BCP, Stored Procedures)
- Data Warehousing and Business Intelligence

**Experience With:**

- Microsoft SQL Server 2005/2008
- Microsoft Excel
- Microsoft Word
- Familiar with data cleansing and manipulation techniques
- Various Text editors and their functionality
- Regular Expressions
- Interpreting data specification documents

**Additional Helpful Skills and Experience:**

- XML
- Grocery Store Back Office Systems
- DOS
- WebEx
- Scripting experience/skills
- FTP
- Data reporting and storage techniques

**Compensation:**

- Base Salary, Incentive Pay and Equity Are all negotiable based on the candidates qualifications.

**Management:**

- This position will report to the Director of System Engineering.

**Travel:**

- Occasional Travel required
