

Revionics Promotion Optimization

● Promotion strategy, planning, execution, and analytics

Retail Performance Transformation with Life Cycle Pricing

Maximize promotion results with demand-driven promotions from Revionics.

Retailers are promoting their products at an unprecedented rate, driven by the need to discount in order to drive consumer traffic and hold off the competition. Pressure from vendors to promote certain brands adds to the complexities in delivering effective promotions. Retailers turn to Revionics to deliver optimized promotions that deliver perceived value to the consumer, and bottom-line results to the retailer. Benefits include:

- Deliver consumer-centric promotions with demand insight
- Reduce promotion cycle time to be more responsive to consumers
- Tightly integrated activities in a centralized, seamless environment
- Centrally managed promotion content and tasks
- Understand options and impact with pre-event simulation
- Accurately forecast impact with single demand engine
- Maximize sales potential by limiting promotion out-of-stocks
- Budget more effectively with promotion forecast

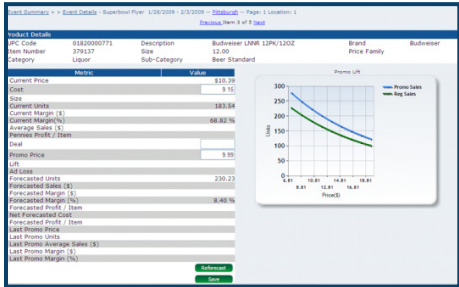

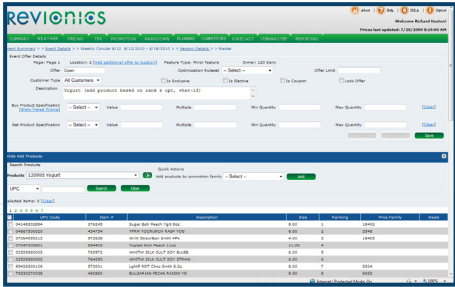

Predicting customer behavior, empowering retailers to achieve their financial objectives, improving customer loyalty, and making better, fact-based decisions

Revionics retailers see:

Sales increases
1-12%

Gross Margin Gains
5-20%

Unit movement growth:
1-9%

Strategic Promotion Insight for Executives - Revionics provides an on-demand, birds-eye view of promotion performance. Attention is drawn to important trends, unexpected performance, and opportunities to shift strategies with shopper insight and integrated analytics. Understand the impact of multiple pricing events, including promotions, with Revionics Integrated Forecast.

Promotion Execution - Automate the delivery of planned promotional events and forecasts to point of sale, headquarter, labor planning, and financial systems with turn-key data exports from the Revionics centralized solution. Never miss a dollar of vendor funds with accurate performance tracking against vendor deals.

Science-based Promotions

Revionics Promotion Optimization arrives at the right items and offers to feature by applying advanced algorithms that blend science, rules, and promotion strategies.

Affinity and Cannibalization - Science provides retailers insight into which products are trip drivers or basket builders. Avoid unnecessary discounts and promote the items that matter to your customers.

Quantify Promotion Lift - Based on merchandising activities: in-store or ad placement. On-demand modeling provides a sandbox for fact-based decision making.

Measure Net Impact - “What-if” modeling forecasts event and total store impact. Simulate a variety of promotion vehicles and merchandising types to understand the total net impact of the chosen event.

Accurate Forecasting - On-demand modeling at the event, version, or offer level predicts impact of merchandising or offer type.

Today's wary consumer expects more from retail promotions

“Without technologies to sense and shape consumer demand, how will your organization learn to adapt to the new consumer? Leading companies are providing their decision makers with insights and optimization capabilities that deliver better results as they focus on improving their relevancy to this new consumer.”
