

Informatica Administrator /Senior Power Center Developer

About us:

Revionics is a leader in the emerging technology of Retail Lifecycle Price Management.

Our solution covers:

- Everyday Price Planning & Optimization
- Promotion Price Planning & Optimization
- Markdown Price Planning & Optimization
- Integrated Demand Forecasting

Revionics provides sophisticated software that analyzes consumer trends in addition to other variables such as cost, competition, and price strategy, to help determine the best price for each item sold in retail stores. Our technology is delivered in a Software-as-a-Service (SaaS) fashion as a subscription via the Internet. This approach allows retailers of all sizes access to technology and pricing expertise that they may not be able to otherwise afford.

Role and Responsibilities:

The position is suited for a highly motivated, technical individual with the desire and drive to build out and streamline processes using cutting edge technology. The individual will have hands on Informatica Administration and Development experience with a proven record of building and coding the framework necessary for data integration and workflow. The individual will also have a proven ability to work within a team in a demanding environment and must demonstrate leadership skills working with multiple people, projects and cutting edge technology, while maintaining a high level of execution.

Duties:

Informatica Administration

- Serve as the first line of support for Informatica issues raised by the System Engineers
- Maintain and support Informatica Development, QA and Production environments
- Serve as day to day contact with Informatica Global Support for issue tracking and resolution for issues that cannot be solved internally
- Provide performance tuning help for development teams including process optimization, cache tuning, etc
- Maintain a library of best practices in order to support knowledge sharing between Informatica architects and developers
- Manage Informatica software patching and upgrades
- Manage Informatica users and roles in order to enforce data security, while making sure all users have the necessary access to perform their tasks
- Interface with the support team in order to schedule and monitor Informatica production jobs
- Establish and monitor change control processes
- Collaborate with Product Development and Customer Service teams.
- Provide regular reports on data collection activities and progress.
- Import data models via Metadata Exchange utility
- Create and manage repositories

PowerCenter Development

- Design, develop and maintain Best Practices Data Integration processes
- Engage in data collection, cleansing and mapping

- Create mappings and workflows
- Work with customers to assist them with data integration activities
- Establish data exception reports and guidelines
- Test and troubleshoot mappings and workflows
- Review incoming files and provide feedback on the level of data quality and completeness based on Revionics data specification standards.
- Configure customer database in preparation for weekly price optimization analysis.
- Document database configuration settings and data mapping.

Skills:

- Preferred candidates will have understanding of data formats and prevalent commercial databases
- Candidates will also have strong T-SQL skills (Queries, Triggers, Stored Procedures, etc).
- Candidates will understand common Internet-based file transfer techniques.
- Candidates will also have proven computer skills with common Microsoft tools such as Windows, Office, Visio, Project, and SQL Server.
- Ideal candidates will be knowledgeable with retail item catalogs and related master files.
- Must have superb Customer communications skills, written, oral and face-to-face
- Ability to turn business issues into technical solutions
- Ability to develop collaborative relationships both internal and external
- Ability to navigate and manage technical issues internally and externally
- Demonstrates passion and enthusiasm
- Excellent time management skills
- Extreme attention to minute detail
- A team player that can add value technically and personally

Preferred Experience:

- 5+ years experience building and managing Informatica solutions 2 years programming experience is mandatory.
- 2 years programming or database development experience
- 5 years of experience with ETL
- Experience with Microsoft Windows Server in a VMware environment.
- 3 years proven Power Center, Data Transformation Development and Informatica Administration experience
- Solid experience with Informatica performance tuning including cache tuning
- Superb organization and time management
- Highly logical and technical person
- Well-developed team leadership skills
- Retail technologies experience a major plus!

Knowledge Of:
